Plants and animals will find it difficult to escape from or adjust to the effects of global warming. Scientists have already observed shifts in the lifecycles of many plants and animals, such as flowers blooming earlier and birds hatching earlier in the spring. Many species have begun shifting where they live or their annual migration patterns due to warmer temperatures.

With further warming, animals will tend to migrate towards the poles and up mountainsides towards higher elevations. Plants will also attempt to shift their ranges, seeking new areas as old habitats grew too warm. In many places, however, human development will prevent these shifts. Species that find cities or farmland blocking their way north or south may become extinct. Species living in unique ecosystems, such as **those** found in polar and mountaintop regions, are especially at risk because migration to new habitats is not possible. For example, polar bears and marine mammals in the Arctic are already threatened by dwindling sea ice but have nowhere farther north to go.

Projecting species extinction due to global warming is extremely difficult. Some scientists have estimated that 20 to 50 percent of species could be committed to extinction with 2 to 3 Celsius degrees of further warming. The rate of warming, not just the magnitude, is extremely important for plants and animals. Some species and even entire ecosystems, such as certain types of forest, may not be able to adjust quickly enough and may disappear.

Ocean ecosystems, especially **fragile** ones like coral reefs, will also be affected by global warming. Warmer ocean temperatures can cause coral to "bleach", a state which if prolonged will lead to the death of the coral. Scientists estimate that even 1 Celsius degree of additional warming could lead to widespread bleaching and death of coral reefs around the world. Also, increasing carbon dioxide in the atmosphere enters the ocean and increases the acidity of ocean waters. This acidification further stresses ocean ecosystems.

From "Global Warming" by Michael Mastrandrea and Stephen H. Schneider

Question 28: Scientists have observed that warmer temperatures in the spring cause flowers to

- A.** become lighter **B.** lose color **C.** bloom earlier **D.** die instantly

Question 29: The level of acidity in the ocean is increased by _____ .

- A.** the extinction of species in coastal areas.
B. the rising amount of carbon dioxide entering the ocean
C. the loss of acidity in the atmosphere around the earth
D. the decrease of acidity of the pole waters

Question 30: The word "**fragile**" in paragraph 4 most probably means _____ .

- A.** very large **B.** easily damaged **C.** rather strong **D.** pretty hard

Question 31: The pronoun "**those**" in paragraph 2 refers to _____ .

- A.** areas **B.** species **C.** ecosystems **D.** habitats

Question 32: It is mentioned in the passage that if the global temperature rose by 2 or 3 Celsius degrees _____ ,

- A.** half of the earth's surface would be flooded
B. 20 to 50 percent of species could become extinct
C. the sea level would rise by 20 centimeters
D. water supply would decrease by 50 percent

Question 33: What does the passage mainly discuss?

- A.** Influence of climate changes on human lifestyles.
B. Effects of global warming on animals and plants
C. Global warming and possible solutions
D. Global warming and species migration

Question 34: According to the passage, if some species are not able to adjust quickly to warmer temperatures, _____ .

- A. they move to tropical forests.
- C. they can begin to develop,

- B. they will certainly need water
- D. they may be endangered

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 35 to 42

In the West, cartoons are used chiefly to make people laugh. The important feature of all these cartoons is the joke and the element of surprise which is contained. Even though it is very funny, a good cartoon is always based on close observation of a particular feature of life and usually has a serious purpose.

Cartoons in the West have been associated with political and social matters for many years. In wartime, for example, they proved to be an excellent way of spreading propaganda. Nowadays cartoons are often used to make short, sharp comments on politics and governments as well as on a variety of social matters. In this way, the modern cartoon has become a very powerful force in influencing people in Europe and the United States.

Unlike most American and European cartoons, however, many Chinese cartoon drawings in the past have also attempted to educate people, especially those who could not read and write. Such cartoons about the lives and sayings of great men in China have proved extremely useful in bringing education to illiterate and semi-literate people throughout China. Confucius, Mencius and Laozi have all appeared in very interesting stories presented in the form of cartoons. The cartoons themselves have thus served to illustrate the teachings of the Chinese sages in a very attractive way.

In this sense, many Chinese cartoons are different from Western cartoons in so far as they do not depend chiefly on telling jokes. Often, there is nothing to laugh at when you see Chinese cartoons. **This** is not their primary aim. In addition to commenting on serious political and social matters, Chinese cartoons have aimed at spreading the traditional Chinese thoughts and culture as widely as possible among the people.

Today, however, Chinese cartoons have an added part to play in spreading knowledge. They offer a very attractive and useful way of reaching people throughout the world, regardless of the particular country in which they live. Thus, through cartoons, the thoughts and teachings of the old Chinese philosophers and sages can now reach people who live in such countries as Britain, France, America, Japan, Malaysia or Australia and who are unfamiliar with the Chinese culture.

Until recently, the transfer of knowledge and culture has been overwhelmingly from the West to the East and not vice versa. By means of cartoons, however, publishing companies in Taiwan, Hong Kong and Singapore are now having success in correcting this imbalance between the East and the West.

Cartoons can overcome language barriers in all foreign countries. The vast increase in the popularity of these cartoons serves to illustrate the truth of Confucius's famous saying "One picture is worth a thousand words."

Question 35: The major differences between Chinese cartoons and Western cartoons come from their _____.

- A. purposes
- B. values
- C. nationalities
- D. styles

Question 36: Which of the following is most likely the traditional subject of Chinese cartoons?

- A. The stories and features of the lives of great men the world over.
- B. The illiterate and semi-literate people throughout China.
- C. The philosophies and sayings of ancient Chinese thinkers.
- D. Jokes and other kinds of humor in political and social matters.

Question 37: Which of the following clearly characterizes Western cartoons?

- A. Seriousness, propaganda, and attractiveness.
- B. Humor, unexpectedness, and criticism.
- C. Enjoyment, liveliness, and carefulness.
- D. Originality, freshness, and astonishment.

Question 38: Which of the following could be the best title for the passage?

- A. Chinese Cartoons and Western Cartoons
- B. Cartoons as a Way of Educating People
- C. A Very Powerful Force in Influencing People
- D. An Excellent Way of Spreading Propaganda

- A. No matter how hard she tried, she could hardly pass the driving test
